Privacy Policy

Fluxline Resonance Group, LLC, doing business as Fluxline
Version: *2.0*
Effective Date: *November 20, 2026*
Last Updated: *November 20, 2026*
Replaces: *Privacy Policy effective November 6, 2026*

The short version

We keep as little as we can. Fluxline does not retain your questions to the RCF AI Companion or its answers. Our AI provider, Microsoft Azure, keeps temporary automated abuse-detection logs (up to 30 days) under its policy (see Section 5.6). We do not store your birthdate, because we never ask for it. We do not train any AI on what you write or ask. We do not sell your information, and our store and the RCF AI Companion show no ads. Anything we keep beyond what is needed to deliver what you bought is something **you turn on**, and you can turn it off. This policy explains the details. Fluxline's own vocabulary is explained in the Glossary of Terms at fluxline.pro/legal.

1. Who we are and what this covers

Fluxline Resonance Group, LLC, doing business as Fluxline ("Fluxline," "we," "us") is based in Salt Lake City, Utah. This policy covers Fluxline.pro and our related sites, the Fluxline account and store, the RCF AI Companion, Fluxline apps, our digital products and programs, our podcast and social channels, and our professional services.

2. Our defaults at a glance

Question	Our answer
Do you store what I ask the RCF AI Companion?	**No.** Fluxline does not retain them. Questions and answers are processed in memory. Our AI provider, Microsoft Azure, keeps temporary automated abuse-detection logs (up to 30 days) under its policy (see Section 5.6).
Do you store my birthdate?	**No.** We never collect it. We store only a yes/no confirmation that you are 18 or older, and the date you gave it.
Do you train AI on my content?	**Never.** No reader or user content trains, fine-tunes, or tunes any model. This is not offered as an option.
Do you keep my journal or goal entries?	**Not by default.** In our apps, your entries stay on your device. Backups and cloud features are your choice.

Question	Our answer
Do you sell or share my data for ads?	**No.** We do not sell, rent, or trade personal information. Our store and the RCF AI Companion show no ads.
What do you keep if I do nothing?	Only what delivering your purchase and account requires, described below.
What is opt-in?	Reporting an answer, saving chat history on your device, cloud backups, optional cloud AI features, and any research sharing.

3. What we collect, by service

3.1 Website visitors

When you browse our sites we collect technical and usage information: device and browser type, operating system, IP address, pages visited, time on page, clicks, referral source, and general location derived from your IP address. We collect it through cookies and similar tools (see Section 12).

3.2 Your Fluxline account

To make an account, we collect your name and email address and the sign-in method you use (Microsoft, Google, or an email one-time code). We store whether you confirmed you are **18 or older** and the date you confirmed it. **We do not collect your birthdate.**

3.3 Store and orders

When you buy from the store we keep an order record: what you bought, the amounts, the order number, the date, and your entitlement (what you now have access to). We store the **exact version of the terms you agreed to and the time you agreed** with the order. Payments are handled by our payment processor, which keeps your card details. We do not store your full card number. For personalized digital files, we keep **download records** (which file, when, and how many times) so that we can resolve payment disputes. If you check out as a guest, we collect your name, email, and phone number.

3.4 The RCF AI Companion

The Companion needs a Fluxline account. It processes your question to answer it, and it does not keep the question or the answer. What it holds is below.

Data	Held?	How long
Question and answer text	**Not retained by Fluxline.** Processed in memory only. Microsoft Azure keeps temporary automated abuse-detection logs (see Section 5.6).	Not kept by Fluxline. Up to 30 days in Microsoft Azure's abuse-detection logs.
Reported answer (only if you report one)	Question, answer, and a reference ID, encrypted, with **no link to your account**	30 days, then deleted

Data	Held?	How long
Conversation thread (so a follow-up makes sense)	Your last two questions and their book references	The session only
Your birthdate	**Never collected**	Not applicable
Your email address	Read from your Fluxline account when needed (for example, to confirm a deletion). **Not copied into the Companion's own stores.**	Not applicable
Consent record	That you gave consent, and when	Until you delete your data or your plan ends
Usage counts	Your daily and monthly answer counts, to enforce plan limits	Daily counts 35 days, monthly counts 13 months
Audit metadata	Which model and pathway handled a request, retries, and stop reasons. **No question or answer text and no account identifier.**	395 days
Entitlement	Read from the store. The Companion never changes it.	The store's retention

Everything tied to your plan is deleted within 30 days after the plan ends.

3.5 Fluxline apps

Our apps are **local-first**. Your entries, goals, scores, and notes are stored on your device in an encrypted database. They do not go to Fluxline unless you choose a cloud feature. Backups are encrypted with a passphrase that only you know. Our apps send us event counts so that we can see whether the product works, such as "a feature was used," and never the content of your entries. Individual apps may add details in their own privacy notices.

3.6 Professional services

If you are a consulting, design, development, training, wellness, or coaching client, we collect what you share and what the work needs: contact and billing details, your responses to prompts and surveys, journal entries or documents you choose to share, and progress measures.

Personal training and wellness clients specifically. Before your first session, our intake process asks for health information relevant to training you safely: medical conditions, medications, injuries and surgeries, allergies, family history of certain conditions, and pregnancy status. We ask for this because our Informed Consent, Assumption of Risk, and Liability Waiver requires it, not because you happened to volunteer it. When you sign that waiver electronically, we keep a signature record (the date and time, your IP address, and your account email) with your signed copy. We do not ask any other type of client (consulting, design, development, or education) for sensitive health, financial, or legal information.

Any sensitive information you give us, in any service line, is treated with extra care and used only for the purpose you gave it.

3.7 Support, email, podcast, and social

If you contact us, we keep the messages. If you subscribe to email, we keep your address and preferences. The Resonant Identity Podcast is distributed through podcast hosts and platforms that give us aggregate listening statistics. Social platforms have their own policies.

3.8 From other sources

We may receive information from sign-in providers (for example, your name and email from Microsoft or Google), payment processors, and public sources.

---

4. What we do not collect

- Your birthdate or exact age.
- The text of your Companion questions or answers, except an answer you choose to report.
- Your journal or goal content, unless you send it to us or turn on a cloud feature.
- Any account identifier in AI governance logs, audit logs, or telemetry for the Companion.
- Sensitive health, financial, or legal information, unless you choose to give it to us for coaching or education.

---

5. AI and your information

5.1 How a Companion request flows. When you ask the Companion a question, it follows these steps, in this order:

1. Your account and your 18+ confirmation are checked. An unconfirmed account does not reach any AI service.
2. Free checks run first: a safety check, a relevance check against the book, and a check against reviewed answers written from the book. Some questions are answered without calling a model.
3. We remove personal identifiers we can detect from your question.
4. The scrubbed question is converted into numbers (an "embedding") so we can find matching passages in the book. The index holds the book, not user content.
5. Our governance system approves the request. It receives **no user identifier of any kind**, not even a pseudonymous one. It sees only the scrubbed question, the book passages, and cost labels such as product and plan. Each run is logged only under a generic random ID.
6. A language model writes a short answer using only those passages. A second check runs on every answer.
7. The answer is shown to you. Fluxline stores nothing about the question or answer. Microsoft Azure's temporary abuse-detection logs are described in 5.6.

5.2 Honest limits of scrubbing. Our filters catch many personal identifiers, and no filter is perfect. **Please do not type personal, health, or other sensitive information into the Companion.**

5.3 No training. Ever. We do not use your questions, answers, entries, or any user content to train, fine-tune, or tune any AI model. When the book is updated, we rebuild the index. We do not train on it. We do not offer an opt-in to contribute questions.

5.4 Models and where they run. Cloud AI for the Companion uses models from Microsoft (primary), with backups from other approved providers, all hosted on Microsoft Azure through our governance system. The Companion is an AI service that runs in the cloud, because the book is too large to run on a phone. In our apps, optional on-device AI runs on your device and sends nothing to us.

5.5 Where data is stored versus where a model runs. All data we store stays in the **United States.** For several models, Microsoft offers only "Global" deployments in the U.S. This means that, while a model reads your scrubbed question, that request can be processed in a Microsoft Azure region outside the United States. Microsoft's terms say that data at rest stays in the U.S. and that prompts are not used to train models. Separately, the Companion is offered only in the U.S. at launch.

5.6 Microsoft's abuse monitoring. Fluxline does not retain your questions or answers. Our AI provider, Microsoft Azure, applies automated abuse monitoring to its AI services. Under Microsoft's standard policy, Microsoft Azure keeps prompts and answers in temporary automated abuse-detection logs for up to 30 days, and content its systems flag as potentially abusive can be reviewed by authorized Microsoft personnel. We have not yet applied for or received Microsoft's "modified abuse monitoring" status, which would turn this off for our use.

5.7 Human review of AI. Two different things happen, and we keep them distinct. (a) When we use AI to help create our own content and services, a person reviews it before it is published or delivered. (b) When you use an AI feature, such as the Companion, you receive the answer directly, and a person does not review it first. Our Responsible AI Usage policy explains both.

5.8 Reported answers. If you tap "report" on an answer, we keep that question, that answer, and a reference ID for 30 days, encrypted, so we can review it. It is not linked to your account, so we cannot reply to you. After 30 days it is deleted automatically.

5.9 Standards. We align AI handling with the NIST AI Risk Management Framework 1.0 (https://www.nist.gov/itl/ai-risk-management-framework) and the NIST Cybersecurity Framework 2.0. These are frameworks we follow. They are not certifications.

---

6. What you turn on yourself

These are off until you choose them:

- **Reporting an answer** in the Companion (per answer).
- **Chat history in a Fluxline app.** If you turn it on, it stays on your device, is not sent to Fluxline, is excluded from cloud backups, is deleted after 30 days, and can be cleared at any time. Exchanges that triggered the crisis path are never saved. On the web, chat is session-only, with no history option.
- **Backups.** You choose where an encrypted backup goes (for example, your own iCloud, OneDrive, or Google Drive). We cannot open it. **If you lose your passphrase, no one can recover your data, including us.**
- **Optional cloud AI features in an app,** on a per-feature basis.

- **Research sharing,** if it is ever offered. It would be a separate opt-in with its own plain explanation. The Companion contributes no data to research.
- **Marketing email.** You can unsubscribe at any time.

7. How we use information

We use information to deliver and personalize what you bought; run your account and process orders; keep our systems secure and prevent abuse; communicate with you about your account and purchases; measure product health through event counts, not content; improve our offerings using aggregated insights; meet legal obligations; and, with your consent, send marketing. We use it only for these purposes.

8. Who we share information with

8.1 We do not sell your information. We do not sell, rent, or trade personal information. We do not share it for advertising. Our store and the RCF AI Companion show no ads.

8.2 Service providers. We use providers to run the Services. They receive only what they need. They are not allowed to use it for their own purposes.

Provider	What they do	Data they handle
Microsoft (Azure, Entra sign-in)	Hosting, sign-in, AI model hosting	Account identity, hosted data, scrubbed AI requests
Stripe	Payments	Payment details, billing contact
Google	Sign-in, site analytics	Sign-in identity, site usage
Microsoft Clarity	Site analytics	Site usage
Apple, Google (app stores)	App distribution and in-app purchase	Purchase data held by the platform
Email and support tools	Messages you ask for	Email address, messages

8.3 Other disclosures. We may share information if the law requires it, to protect rights, safety, or the integrity of our systems, in a sale or reorganization of our business (with notice to you), or with your consent.

8.4 Aggregated data. We may use aggregated or de-identified information that cannot reasonably identify you.

9. How long we keep things

Information	Kept for
Account (name, email, 18+ flag and date)	Until you delete your account

Information	Kept for
Account deletion requests	Started within 24 hours of your request and finished within 30 days
Order records	7 years after the order
Download records for personalized files	7 years after the order, with the order record
Companion data	See the table in Section 3.4
Website analytics	Up to 14 months (Google Analytics) and up to 13 months (Microsoft Clarity), under our provider settings
Client files and communications	Per your agreement and legal requirements
Personal training and wellness health intake, signed waiver, and signature record	7 years after your last session
Support messages	3 years after your last message

10. Your choices and rights

10.1 The four doors for deleting. You can delete your data from the Companion in one step. You can also send a privacy request, delete your Fluxline account (which erases your Companion data automatically), or let your plan end (which deletes everything tied to it within 30 days).

10.2 What deletion does. We destroy the key that protects your data, so anything left cannot be linked back to you. Because our governance system never received an identifier, there is nothing to erase there. We send one confirmation email from your account address and then forget it. After you delete, you go through consent again before your next question.

10.3 Your rights. You may:

- **Access** what we hold about you. For the Companion that is your consent record, entitlement status, and usage counts. There is no question history to export, because none exists.
- **Correct** your details. Do this at account.fluxline.pro.
- **Delete** your information.
- **Export** your content. Our apps use an open Markdown backup.
- **Opt out** of marketing at any time.
- **Withdraw consent** for anything you opted into.
- **Ask how your data has been used.**

To make a request, write to privacy@fluxline.pro. We respond within 45 days.

10.4 California protections. Fluxline voluntarily gives all U.S. users the core California rights: to know, to delete, to correct, to opt out of any sale or sharing (we do neither), to limit use of sensitive information, and to be free of discrimination for using these rights.

10.5 Visitors and customers outside the United States. The RCF AI Companion, the RCF Founders Pass, the Identity in Motion program, and our apps are offered only in the United States at this time (see Terms of Use 9.6). Outside the United States, we offer only the digital editions of the book (the eBook, Audiobook, and Workbook PDF). If you bought one of the U.S.-only products above while living outside the United States, you may request a full refund by contacting support@fluxline.pro.

If you are in the European Economic Area or the United Kingdom, Fluxline Resonance Group, LLC is responsible for your information. When you buy a digital edition or create an account, we collect your name and email address to deliver your purchase, give you access to your account, and provide support. On our websites, analytics and other non-essential cookies run only after you accept them in our cookie banner, and you can reject them at the first step. We rely on our contract with you, our legitimate interests in running and securing the Services, legal obligations, and your consent. You may ask to access, correct, delete, or export your information, object to its use, and complain to your local data protection authority. We keep your name and email while your account is open, and order records as stated in Section 9. We store information in the United States and rely on the transfer safeguards our providers offer, such as the EU-U.S. Data Privacy Framework and Standard Contractual Clauses.

11. Security

We protect information with encryption in transit and at rest, access controls limited to the people and systems that need them, and reviews of our systems. Local app data uses AES-256 encryption (SQLCipher). We never store your passphrase. We do not put personal data in web addresses, and we keep personal identifiers out of standard application logs. No system is perfectly secure, and we cannot guarantee absolute security.

12. Cookies and analytics

We use cookies and similar tools for: **essential** functions (sign-in, security, remembering your cart); **analytics** (Google Analytics and Microsoft Clarity, to understand how the sites are used); and **functional** settings (theme, text size, accessibility options). Analytics and other non-essential cookies run only after you accept them in our cookie banner, and you can accept or reject them at the first step. You can also manage cookies in your browser settings.

13. Age

Our Services are for people **18 and older.** We do not knowingly collect information from anyone under 18. If we learn that we have, we will close the account, delete the information, and refund any purchase.

14. Where information is stored and processed

We store data in the **United States.** As described in Section 5.5, some AI model processing can occur in other Microsoft Azure regions. Providers that handle data for us may operate in other countries. If we expand outside the U.S., we will update this policy before we do.

15. If something goes wrong

If a security incident affects your information, we detect, contain, assess, and fix it, notify affected people directly, and publish what happened without defensive filler. By design, a breach of the Companion could expose metadata, counts, entitlement status, and reported answers inside their 30-day window. It could not expose a question history, because we do not keep one.

16. Changes to this policy

If our practices change, we will post the new version with a new date. For a material change, we will tell you by email or in the product at least 15 days before it takes effect.
